

REACH Statement

Date: January 1st, 2013

This statement is SCAN Antenna's position regarding REACH, the European Community Regulation on chemicals and their safe use (EC 1907/2006). The Regulation deals with the **Registration, Evaluation, Authorization and Restriction of Chemical substances**.

As an environmentally responsible company, Scan Antenna supports REACH and other legislations with the aim to improve the protection of our environment and human health and safety.

SCAN Antenna does not produce substances or preparations which need to be registered according to the REACH regulation. Our products are 'Articles' as defined in REACH Article 3 (3). There is no intended release of substances subjected as to REACH and therefore registration does not apply for our products.

Suppliers of articles must provide recipients with information on SVHC (Substances of Very High Concern) if those are present above a concentration limit of 0.1% on an article level.

SCAN Antenna's products do not contain any of the substances listed on currently published SVHC List.

Notification to the ECHA (European Chemical Agency) of articles containing SVHC above a concentration limit of 0.1% and above SVHC mass/volume of 1 tons per year manufactured in the EU does not apply to SCAN Antenna.

Scan Antenna will continue to monitor the REACH legislation to ensure continuous compliance.

Jens Pedersen, Managing Director
